Serie Design Outdoor Sound System

The outdoors today represents a space in which furniture and design become increasingly important.

For our "SOUND GARDENS" project we have selected a line of speakers for terraces, swimming pools and gardens whose lines, the result of careful research, can give a unique style associated with resistance, solidity and 360 degree sound diffusion even at temperatures rigid.

AkuTek's ALDS line offers a wide range of immersive speakers that revolutionize the acoustic experience through a perfect fusion of Form and Function, inspired by Nature.

Each ALDS speaker, individually and meticulously produced by skilled craftsmen, can be considered a unique piece of "Sound Art", offering advanced sound, combined with an innovative and expressive design.

The **AkuTek ALDS** Series Cylinder family now adds its most complete and versatile element, a new opportunity to enjoy music even on more convivial occasions

Born within Cylinder family, the Cylinder table dynamically interacts with its environment, blending in by actively becoming a piece of design furniture, providing new opportunities to enjoy the beauty of **Akutek** sound.

The Cylinder Table is the most complete and versatile element of the Cylinder Family, a new way to enjoy music on friendly occasions.
